

Automatic RK6 sales import to SH4

Settings in R-keeper 6

In Rkeeper's Manager's settings file (rkeeper.ini- by default in folder \RK6) under section [Appender] put new string:

[Appender]

.....

PostEXE = path for file ImportRK.exe and name of Sh4 server (C:\UCS\SH4\ImportRK.exe SDBSERV)

.....

Important: Where name SDBSERV should be the name under which automatic import was configured in IRksetup.exe (you can check it in HKEY_LOCAL_MACHINE\SOFTWARE\UCS\SHTrans)

Run RK6 dispatcher and add new user: sklad with password sklad

Settings in Store House

Run IRkSetup.exe.

- For menu group "Restaurant menu" set paths and types for Rkeeper's databases.
- Set restaurant's code. Can be checked in Dealerrk.exe
- Set user name and password. User must have rights to import lists and sales, and do subtract of products. If "Special account" is enabled, this user should have rights for both accounts.
- Mark "Use alternative products" if restaurant is using alternative products for subtracting.
- Set abbreviation of correspondent for sales.

ImportRK setup utility 4.52 *

Group of products

Goods
Restaurant menu
Hardware keys

Lists

Path: C:\UCS\RK6\DB Type of source: Paradox

Import tax rates

Expenditure

Path: C:\UCS\RK6\DB Type of source: UDB

Type of grouping: by deletion reasons Break by stocks

Restaurant code: 55

Automatic import settings

User name: Admin

Password: *****

Automatic document creation settings

Use replacements when creating complectations

Correspondent code for the issue slips: S

Additionally... Save

How it works

After “Close day” (append32.exe) finished closing day, automatically will start application, which will do import and subtracting of products. This application creates log, which will be displayed on the screen of this application

Versions

This option works with versions starting from:

Rkeeper: server 6.62, manager 6.79g

Shouse: 4.14
